Subject: RE: Li Tungsten MARSSIM Alternative Approach
Date: Monday, November 24, 2014 1:08:00 PM

USACE has reviewed the addendum with additional information for the alternative approach to complete the FSS on behalf of the EPA. Given the explanations from the call on Friday, the document is sufficient. However, one question that is raised by the addendum document is: Figure 2 shows 5 of 10 surface samples from the survey unit have been completed. It is assumed, but it is not stated, that the other 5 original systematic samples will be collected? They still should be. Please let me know if you have any further questions.

Subject: Re: Li Tungsten MARSSIM Alternative Approach

As requested on the 11/21/14 conference call, SEC has prepared the attached addendum with additional information about the proposed alternative for completing the FSS in the area flooded by groundwater.

I have also attached the approved FSSP that is referenced in the addendum,

We appreciate your help moving this last part of the FSS along to complete and submit the FSSR for review as soon as possible so as not to intrude on the holiday season.

Please contact me if you have any questions.

Thanks again.
