Hey Amy,
We have not yet received information from ERT regarding the particular entity responsible for the new releases. ERT is scheduled to meet with Limetree today to discuss this. I believe once they meet with Limetree, the addendum to the CAS report will soon follow. This addendum should detail which entity is responsible for the specific portions of the new releases.

Ricky

Subject: FW: Limetree - ERT

Hi everyone –

Please see Paul's email below. Did the program receive any information that actually ties the new releases to a particular entity? If so, can Wilkie and I please see these.

When we last emailed about this , I know Nidal was very positive about us moving forward but I don't believe we actually had conclusions re which entity was responsible for specific portions of the new releases. If that has changed – great. I look forward to seeing that information.

Subject: Limetree - ERT

Hi. During the Limetree coordination call with RA/DRA today, LCRD mentioned that some conclusions have been reached about recent contributions to the g-w contamination. If you don't have the latest from Nidal, et al, pls reach out to them. In our 9/24/21 letter to potential bidders, we wrote, "Any future refinery owner will be obligated under RCRA to remediate contamination on

or migrating from the property it acquires." Pls keep me posted about this, including about whether the purchaser of the refinery is going to need to get its own RCRA corrective action permit or something else. Thanks
