Yes, we are relying on the modeling submitted with our attainment plan. However, if we need to re-submit for purposes of supporting our clean data determination request, please let me know. It would be the same modeling, which is why I didn't re-submit it in the first place.

Thanks,
Emily

Emily,

I'm assuming you guys are relying on the modeling submitted with the 6/5/15 attainment plan, but Cody and I would like to verify. Please advise.

Take care-Lachala

Lachala,

Question.. Is MDNR relying on the modeling in the Attainment demo to support the Clean Data Request for SO2 in Jefferson CO? Or, are they submitting additional modeling to support that request?

Thanks,
Cody
