---

Good Morning Chris,

Please see below from Feyi. In the next week or so Ameren is planning to perform treatment injections at the Ameren Huster Substation located at 3800 Huster Road, St. Charles, Missouri 63301. Attached is a map of the Site identifying the injection locations. Sodium persulfate will be injected in wells marked as ISCO-1 through ISCO-14, and zero valent iron will be injected in wells marked EHC-1 through EHC–16.

Please send me the necessary forms for this work and I will complete and return to you ASAP so as not to hold up this work.

Thank you,
Lisa Meyer

Subject: [EXTERNAL] MGS notification of the planned ISCO injections at the Findett Site

EXTERNAL SENDER **STOP.THINK.QUESTION.**
Verify unexpected requests before opening links or attachments.

Dear Barbara/Lisa,

Can you confirm to me if you notified the Underground Injection Control Coordinator at MGS, Chris Vierrether chris.vierrether@dnr.mo.gov of the scheduled ISCO injections beneath the Huster Substation commencing Jan 24, 2023? If not, send him an email and copy me.
There are a few forms that should be completed before or during the injections, that your contractors will need to complete and return to MGS.
