Hi Cheryl,

As a follow up to and summary of our conversation earlier, NHDES will be requiring increased sampling frequency for all homes in the Ross/Tokanel Drive area as part of the renewed Groundwater Management Permit. While the Groundwater Management Zone will only encompass the properties that exhibit an AGQS violation, the permit itself will likely require monitoring of all homes in this area at least annually and much more frequently (quarterly) for homes with exceedances, detections, or where they abut properties that had exceedances. As we discussed, NHDES agrees that it is important to conduct frequent monitoring for those houses that may not currently exceed the AGQS to monitor for contaminant fluctuation. This is particularly important if there is a change in the pumping regime in the area of the site, to ensure that contaminant migration is adequately monitored.

Assuming that the Group provides the updated GMP application (GMZ map and proposed schedule) within the next week or so, NHDES anticipates being able to issue the permit by the end of March. We will discuss the proposed monitoring schedule with EPA before anything is finalized. It is also likely that the permit will require revisions within the next couple years as additional data collected in support of the RI is received and any selected remedy is implemented, as NHDES does not consider bottled water or POE systems to be permanent solutions for the area.

Thanks Cheryl and feel free to contact me if you have any questions or would like clarification on where NHDES stands with the Ross/Tokanel area and on-going monitoring. I'll be in touch regarding this again soon after the updated permit application information is received.

Sincerely,

-Andy

Hi Cheryl,

This letter looks very good. I found a couple of typos and added a couple commas for clarity. See attached.

**** External Email ****
HI Jim/Andy-

I have drafted a response to CSG regarding their February 7th summary report.

Jim S I read and agree with all your comments that this report doesn't explain or get into interpretation (but the RI will!)- I am planning to add a web section to the EPA page for residential sampling which will include the introduction letters reports, result letters, etc. This should hopefully address some of the issues by making them all available.

Melissa/Robin: I used this response letter to also request quarterly sampling of the 6 homes with 1,4 D detections below AGQS as well as the PFAS (some of these had follow up sampling some did not- but quarterly is what we are doing in the other neighborhood. I also noted we would decide next steps shortly , if any, and get back to them.

Thoughts?

Cheryl

The Ross/Tokanel Sampling Letter Report is attached. We are preparing sampling results letters for each resident and plan to mail the letters on 2/12.
