Took AL this morning; this afternoon following up on Williams SS017 dispute response and ST-12 issues. We learned from Terra Therm that Amec has given orders to begin shutdown of extraction system, which is a major concern given that the site is still hot, there is still mobile NAPL, the water table is up within the more transmissive cobble zone and contaminants could spread. Sent comment to amec and also spoke with the AF BEC who seems to share our concern that extraction system should continue.
