Unfortunately with all the Beede work that needs to be done before March 30th I am not far along for this Tinkham meeting – esp Given they expect the meeting to be 5 hours long. It would be helpful if everyone is up on all the past ri/rd/ra documents since they are presenting past information to support their discussion as we will be as well.

It would be helpful Ken if you could provide information or slides on the GMP/annual reports and what work is required for the renewal coming up and how the data in the annual reports should be changed or otherwise presented. This would go a long way to show their lack of overall understanding and presentation/evaluations we have been looking for at the site – to go along with the 34 page CSM/bedrock comments we supplied.

Melissa- since I am on the IC computer I cannot see your calendar for next Thursday or if you are free or would want to travel for that meeting.

Cheryl

FYI I am out of town on 3/23…The afternoon of 3/22 could possibly work for me if the meeting is in Chelmsford…

Subject: Tinkham Government Team Meeting

Hi Cheryl,

DES would like to have a government technical team meeting in advance of the planned meeting with the Tinkham RPs on April 3. It appears that the week of March 26 has very little availability for both Jim Soukup and Robin Mongeon, but the week of March 19 still has decent availability.

We propose to have a meeting on either the afternoon of **March 22** or any time on **March 23** and can either have the meeting in Concord or come down to Chelmsford, if that is helpful to you.

Please let us know what your and Bill's availability is.

Thanks, Ken
