That will work.

Thanks

LOL
In this case, go ahead and post as final since the comment was not very significant. What I'll do is include a copy of the email that acknowledges that my issue was resolved in EPS. Sound good?

Ok. Remind me on the formalities. It seems like we would go ahead and issue it and post as final if you had no further comments or we would do a proposed and issue. I hate all of the terms.

Thanks

Ah, OK...see it now. I was skimming the citations column for anything "40 CFR 64". Thanks.

Hey, Jason:

I do see where the (b)(6) states that the source must submit a CAM plan for the EAF with regard to the PM limit following commencing operation, however, I didn't see such requirement in the permit itself. Did I just overlook it? Thanks.
