Carolyn – Uxo Pro input – Primarily FVM 4. – Feel free to add the UXO Pro input if you believe it will add value to your letter. Your letter can be moved forward to USAF.

Please disregard my attachment if UXO Pro attachment came thru from Steve's direct email to you (I just forwarded, Steve's attachment). Thank you.
Please let Steve and I know if EPA/ADEQ need pre-call, but I think your letter is OK for USAF/AMEC conversation.

I think that the agencies are aligned with getting the "Phase II" wells installed as quickly as possible, then reviewing the new data, and getting groundwater remediation re-started. With the new well installs, maybe there is a chance for minimizing data gaps. I am hopeful that additional borings/wells can be successfully obtained later, if needed. I think your letter will establish in the Administrative Record re-opener opportunities (via the Agencies' FVM 4 and 5 RTC evaluations).

Thank you.

Subject: 2016-11-7 - WAFB - FYI - EPA eval of USAF FVM 4 and FVM 5 rtcs - For Mon Nov 7 USAF Agencies conf call - ST012 - SEE to EBR - cda epa

FYI – Need UXO Pro input ASAP – I have no significant issues with message. Does UXO Pro have any must-be-instituted changes to this letter/EPA message? This is Carolyn's EPA letter which I believe you already have the informal, working versions.

Thanks.

Wayne

Your probably digging out from a week of email after being out in the field. I've drafted a response to the RTCs on the FVMs; incorporated Evas comments this morning. Do you want to add any comments to this before I send it or do you prefer to discuss them on the call this afternoon? I want to send this out ASAP in advance of todays call
