Subject:	ROC with LL on 401 cert for Lahina
Date:	01/29/2010 09:26 AM

Had my first monthly 15 minute call with Larry:

1. In concept, CWB was in agreement to fund ASO overtime in order to process the FSRs for 319 and 106 grants when needed for this year. SDWB was also ok for PWSS.

2. No progress on the status of the Tom A, Tom See, Gail and Kelvin positions. In the big black hole of the state budget office.

3. He expects the leg session to end by April so we should target either the first or second week of May for the HI grant negotiations.

4. TMDL, Docket 2 - fish consumption issue. HDOH want to go with the EPA national level for fish consumption as most of the fish eaten in Hawaii is imported and it is within EPA's discretionary acceptable range. Janet - see Sara for specifics and he knows you were having a call at 3:00 yesterday on this matter.

5. 401 cert regarding the Lahaina UIC permit. Larry said he was concerned that this may set a precedent for the island and was concerned about the workload. I responded that the comparison about the work load was a 401 cert or a NPDES permit - each would be in HDOH's court. I told him that you would continue to coordinate with Alec and Ted Bohlen as we proceed.

Next call schedule for the end of Feb.
