We are drafting some specific changes for the Lahaina permit which we will be running by the Co. probably starting next week. We had a call with them where we went over our proposed changes conceptually and they were not real happy. Our changes (disinfection/U-V and declining total nitrogen loading limits) are substantial enuogh that we will have to re-notice the permit. Not sure of timing for that, but we'll keep you posted. David

Hi David,

Thanks! I'll make the change to the LA Biosolids Pilot.....thanks for check this over.....and as ususal, just let me know when any Hawaii/Pacific stuff comes up.....by the way how are we on Lahaina?

Thanks!

Dean

Hi Dean,

The four items listed for my office (City of LA Biosolids Pilot should be in Ground Water) seem fine. No action dates were listed, which is okay, but the APS/Cholla Power Plant CO2 permit is going to be first out of the gate for us. We are coordinating with ADEQ, and I expect we'll issue the permit within the next three weeks.

Thanks,
David

Subject: Any comments, newest, revised Water Div. Priority Media Outreach Matrix

Hi Folks,

Sorry, to keep sending this around in different forms, but been asked to revise and revise.....

This version has been shortened down from the last one, as it focuses on the higher priority media outreach possibilities. I know we've gone through this before, but if you all have a chance in the next day or so, please do a quick look over and let me know if there are any comments.

Sorry to say there may be some other revisions from OPA, such as linking up the possible events to other "core messages for R9".....

Thanks.....
