Sorry - shouldn't do email after 9pm. Ted stated that DOH did not have any specific comments on our 308 letter to the County, but he requested that they have a chance to review any sampling plan submitted by the County prior to its implementation. I agreed that we could share the sampling plan when we get it. Per 401 certification, he noted that the next step is EPA's - in other words, until EPA requires the County to seek 401 cert for the UIC permit renewal, there is nothing really in DOH's court - and that the state will consider an application when/if it is submitted. I pointed out that EPA would prefer (upfront) that our two agencies not be at odds about requiring Maui Co. to seek 401 cert for the Lahaina injection wells, and that based on our December meeting it appeared that at least some folks in DOH were very opposed to us going down this path. His response suggested DOH's position was a bit more neutral on the subject, and that they understood why EPA is going to require the County to seek certification. So definitely a more conciliatory and potentially productive stance.

Let me know if you have questions.

David

Sara/Nancy:

I saw the message from Nancy R, and the only thing I would add is that I have had a couple conversations with Ted Bohlen (AG's Office) about our actions on the Lahaina WWRF and he provided me with DOH's perspective. Thanks, David

Any items for Nancy's call with Larry Lau on Thursday?

Sara Roser to: David Albright

01/26/2010
10:03 AM

David:

Nancy Woo has a short call with Larry Lau scheduled for Thursday. The purpose of this monthly call is to keep Larry informed of progress made on water matters.

This morning, I asked Nancy Rumrill for a sentence or two about the Lahaina permit. Are there any other points regarding groundwater that you would like Larry to know? Barry already gave me an update regarding the staff cuts in the SDWB (3 environmental health specialist / sanitarian positions that were located in the counties).

Thanks, Sara
