Moye,
GSA at the DFC has related that the limited funding for one particular SWMU (Investigation Area 03) has had to be reallocated elsewhere due to COVID-19. That one area had a projection of achieving the following codes, CA300, 350, 400, 450 and 500, by Sept. 30, 2020.

EVRAZ appears to be on track for two of their six SWMU projections, but any progress on their Coke Plant SWMUs (the remaining four SWMUs) are on hold. I suspect that the root cause is due to a lack of funding. The Coke Plant area is an area that had plans to leave some SWMUs in place and to subsequently record an institutional control to ensure protectiveness; however, that plan has since changed and the facility is now considering and planning to redevelop the area for new milling operations.

I hope this helps, let me know if you have any questions or need additional information.
Thanks,

**Richard Mruz, Jr., REHS**

Moye,

Sorry for the delay.

Regarding our corrective action goals, the COVID-19 pandemic appears to be really affecting some of Colorado's PPA-GPRA sites while not at all on others. Two facilities it appears to be affecting the most are the U.S. General Services Administration at the Denver Federal Center and EVRAZ Rocky Mountain Steel Mill in Pueblo. The one where it appears to be having no affect at all is our E.I. Dupont/Chemours/Louviers facility in Louviers, CO. In short, based on recent correspondence there are currently significant delays in accomplishing projections this year, which will likely trickle into the next, but as we more or less determined last year these accomplishments need to be fulfilled within the plan year, so, by end of FY 2021. I'm still hopeful (the glass is always half full with me), but time will tell.

Regarding our commitments for permits, I believe we remain on track and should accomplish those projections. On a side-note (it wasn't projected within this plan) we recently renewed a Post-closure Care permit at the Denver Arapahoe Chemical Waste Facility (DACWPF). This was an arduous battle primarily because we added PFAS to their permit and revised action levels (lowered) in their secondary leachate collection sump.

Please let me know if you want more detail.

Thanks,

**Richard Mruz, Jr., REHS**

Hi Doug,

Just checking back to see how things are going? Could you please review the email below?

Thanks!

**Subject:** Checking In

Hi Everyone,

I hope you and your families are all safe and well. I wanted to check up and see how everything is going?

Since we'll be working from home for the next month, I was wondering how you are working through COVID-19?

Do you think that there may be potential impacts to commitments for:

- Permits (and, if so, how)
- Corrective action goals (and, if so, how)

Is there anything that we can do to help?

Thanks!
