FYI - I will be waiting to send the WQS review package (CD-rom like I did last time) until I can include the updated version of COMAR that includes the amended language. That should be on or about 3/23. So look for the pkg soon thereafter.

JB

John:
The subject of PAMs for 2013 may have interested you. It appears that WQ 01c may be modified to include tracking of State progress towards: 1) nutrient reduction, 2) setting watershed priorities for watershed, 3) establishing nutrient reduction targets, etc. You know, stuff that was included in Stoner memo from last year.
