Thanks,
The permit for PH needs a lot of work. There is an advantage for Elizabeth/Dave to see the facilities and set the record straight on the deficiencies in the application that complicated the drafting of the permit.

---

FYI---I talked to Stuart this morning to see if DOH had any feedback on the agenda as we try to pull together a better draft agenda for the December meetings. He said he didn't have any feedback but would check with the CWB, SDWB, etc and let us know.

He asked about whether or not he should contact the Navy about a visit to the Pearl Harbor shipyard. I suggested that he talk with Darryl and have him coordinate with Elizabeth and Dave. I indicated that EPA would not go to Pearl Harbor if DOH wasn't going since its their permit and he said they would go. He was going to talk to Darryl today.

He confirmed that the next call with Nancy was next Friday (11/16). He asked if we were still going to have the Tuesday, 11/20 call--I said we would see how the call next Friday goes and make a decision at that point.

Stuart, Alec and Gary:

Aloha.

My staff has identified the following potential topics for discussion during our fast approaching December end of year meetings. Please take a look at our list below and let us know your thoughts, additions etc. There is significant prep work to be done in advance of December to ensure we have a mutually productive week. As previously discussed we are exploring the opportunities and benefits of trying to do a site visit(s) (Pearl Harbor dry docks, restoration sites) while we are there, this will of course depend on schedule and needs. We welcome your ideas.

Tina has the lead to block out a schedule and she will be coordinating with Stuart regarding room reservations and times. Once we agree to a list of topics, the respective program staffs at EPA and DOH can hammer out details and prep.

1. HDOH Water Priorities

2. NPDES – Workplan performance and commitments, including general permits (1.5 hours)

3. Training for DOH Enforcement and NPDES staff/managers regarding incorporation of Compliance Schedules in permits (EPA lead – 1 hour)

4. Groundwater--106/DW SRF 15% Set Aside/PWSS/SRF--- DOH to provide EPA on status and updates for framework/strategy to improve use of funding; updates on ongoing work (1.5 hours)

5. PRC / 319 – Status, performance and assessment of efforts to implement the agreed upon Strategy (May 2012). DOH present highlights from Annual Report; Plans for next 6 months including revision of State PRC Management Program Plan and also discussion of how the non-RFP contracts (CCH Kaiaka Bay, HACD, etc) support the program (or not).

6. Integrated Report – DOH present the highlights and overview of Draft IR, including new listings, rationale for

delistings, trends etc. (30 minutes). For all Programs management and staff.

7. Monitoring and assessment priorities, including source tracking and pharmaceutical monitoring. (1.5 hr)

8. Priority watersheds
   a. Hanalei Watershed – DOH present the Watershed Plan, identify next steps to implement. Results/ update on monitoring/data analysis and next steps/ plans for additional monitoring etc (1 hr). All relevant programs – working meeting.
   b. West Maui Watersheds – Working meeting for all relevant programs. Overview of watershed plan (NOAA and/or SRGII?); watershed plan implementation efforts/plans;

9. Lahaina--tracer study; status of DOH monitoring data and data analysis; 401 water quality certification; next steps?

10. Enforcement – status check on progress, identify any key cases/ issues (30 minutes).

11. Implementing Water Quality Standards in permits, discuss strategy for HI – Working meeting to include all relevant Permits, Enforcement and WQS staff and managers.

12. Senior Management meeting (Woo, Gill, Yamamoto) on Fiscal Management commitments.

Thanks,
nw
