---

I talked to Dan and the contract has been signed by DOH and UH. ASO is now in the process of encumbering the funds. Once this happens UH will get the contract Notice to Proceed (NTP). Dan was not clear how long this process might take. Hopefully the NTP will be issued soon but we should flag this for Nancy and Stuart's call next week as something needing Gary's attention.

Is Craig suggesting some kind of hold up on the second contract at DOH? Was not sure based on his cryptic note.

FYI. Craig Glenn did the overflight and found the warm waters. Looks like they hope to start the pre-dye work June 20.

Yes, over the main target for sure. Still processing like busy beavers (it was a very, very rough ride), but can tell you the warm waters are there.

We are preping all the marine science ops for June 18-24 deploys. The student monitoring team arrives June 20. Well ops the week after, pending permits. It sure would be good to get the second contract signed by DOH. I need to start.

Dear Cindy and others,

Please find below the link to download the Draft Work Plan for the Lahaina Groundwater Tracer Study, for your review. Apologies for the delay; we wanted to make quite sure that the plan was correct and complete.

Best regards,
Craig Glenn
