I didn't have this report , nor do I have the work plan in the references. However, the report Heidi just sent me the link to (thank you) seems to have all of the information in it including the lift reports. I think that should be sufficient for now.

This RAR does discuss the screening and final FSS of the dredge spoils, debris, and equipment. All useful information.

Thanks for finding it.

Lorenzo, thanks for finding the lift reports. As I mentioned above, I think the report sent by Heidi covers that aspect of the project.

Hi Ellis,

Not positive if the following documents are what you are looking for but I have made a request to get pdfs of them and will forward them to you when I get them.

Lorenzo

Lorenzo,

When the creek was dredged in 2007 the spoils were spread out on parcel A and scanned for radioactive nodules.

I have the RA report, but it doesn't include any information about the radioactive screening of the spoils, just the creek bottom.

Would you please send me the radiological screening plan for the spoils and the report of the results?

Thanks.
