Your email was perfectly timed. I had it opened when I was talking with Stuart. Responses below.
thanks,
nw

▼ David Albright---02/23/2011 10:30:59 AM---Nancy, - I sent Stuart a draft copy of an enforcement order we are preparing to share with Maui Co.

Subject: Items for your call with Stuart

Nancy,

- I sent Stuart a draft copy of an enforcement order we are preparing to share with Maui Co. The order would require the County to achieve full non-chlorine disinfection at Lahaina WWRF by June 2013. We wanted DOH to be aware of this, and to provide them an opportunity to weigh in before we send the draft order to Maui County. Any comments or concerns with us moving forward?
Stuart will have try to have a response to you by next week or sooner.

- DOH is working on two projects at Lahaina - 1) an introduced tracer study, which will utilize GW 106 funds and is expected to be conducted by UH researchers (this project is also being coordinated with a contract from Army COE in Honolulu); and 2) a coastal seep sampling project that DOH is proposing to do in-house. While Dan Chang has been taking the lead on these, CWB staff are also now getting involved, and would potentially be conducting the seep monitoring. The burden on Dan's time is significant and it would be useful to have greater involvement from CWB - from a time perspective as well as from a CWB programmatic perspective. Watson O is involved in these efforts, but it is unclear that Alec is aware of and providing much support. EPA is very appreciative of this support and cooperation from DOH.
Stuart is aware of the workload issue. I raised the issue of Dan being overloaded.

- We hear that the LCMS purchase is still stuck in procurement purgatory. We remain a little concerned about them getting this done this FY, and absent the purchase, they will probably leave quite a bit of GW 106 money unspent. This too falls into Dan's lap.
Stuart will raise to Gary Gill to take on.

[Nancy: please note that we are not complaining about Dan - he is a gem - but we are concerned that he has taken on (or been put upon) so much, that he may not be able to pull it all together without more internal support and assistance]

That's it for me.

Thanks,
David
