David, Good idea for a conference on this. I'll coordinate a meeting for early next week with Dan and Watson's people that may do the sampling. Thanks, Nancy

Hi Wendy,

Thanks for the note. I'm sorry I was not able to get back to you last week. We do have the 401 letter that Stuart signed.

As for the seep sampling, I think it is good to ask these questions of DOH. There may be some disconnect between CWB and SDWB, as Dan Chang seems to be full steam ahead to have DOH conduct the seep sampling. Deliberative [redacted] David

▼ Wendy Wiltse---02/09/2011 07:37:45 PM---David and Nancy, I just found a copy of the signed 401 cert letter for Lahaina WWRF Injection wells

David and Nancy,

I just found a copy of the signed 401 cert letter for Lahaina WWRF Injection wells on my fax machine and wanted to see if you received a copy.

A couple of other updates. I have not heard a word about the DIRE Coalitions meeting with Mayor Arakawa last week. I was invited by the mayor's assistant then received a call saying he could not confirm that I was invited by the mayor...so I did not attend.

Hudson and I discussed the news that Watson's group would be doing the monthly seep sampling. Deliberative [redacted] The seeps are difficult to find, even if you are in the water and know what to look for. I swam the site last week and with difficulty could locate one seep....and I've been there twice before with those who knew where to look. Ideally the seeps would be sampled by divers with collection devices like funnels placed over the vents to insure capture of seep water. I beleive the seeps can be confirmed in the field by temperature. I recommend we set up a call with Watson to hear about his plan to sample and offer suggestions as needed to get the samples we want.

Wendy
