Hi Carmen,

Regarding Friday, 9/19, 9:30 am looks to be best for us. Will that work for you?

Regarding meeting topics, you wanted to provide information regarding notification and remediation processes. Also, we are doing a historical PCB study for buildings 52/52A and should have some results by then. I know you were interested in the possible timing and source(s) related to the PCB release.

We are waiting to get a meeting confirmed on another matter and will have to drop anything I am doing to be in that meeting which may be scheduled anytime during the week of September 15. Friday might work on my schedule to have a conference call with you and your team. Also, please let me know the purpose of the call so I can be prepared.

Hi Carmen,

On September 4, I responded to your email and left a phone message requesting that a phone call be scheduled during the week of September 15. I asked that you get back to me with some suggested days and times for the call and haven't heard back yet. Are you available next week?

Dear Mr. Wehle:

Thank you for sharing the subject results of PCB investigations at the Lawrence Berkeley Laboratory, Berkeley, California. I have conducted a cursory review of the PCB results. LBNL needs to notify EPA of the PCBs at their site under the Toxic Substances Control Act (TSCA) regulations in 40 CFR 761.61. As you are aware, the TSCA PCB regulations are not delegated to state or local regulatory agencies. Please give me a call to discuss the notification and PCB cleanup process.

Thank you for your courtesies. I look forward to your reply.

Sincerely,

Carmen
