Sara,
Our draft permit is on hold until we get the County of Maui to apply for and obtain a 401 certification.

> CWA 401 certification is required for any permit or license issued by a federal agency for any activity that may result in a discharge into navigable waters to ensure that the proposed project will not violate state water quality stds.

A letter will be sent to the County to inform them that they must apply for 401 certification. Maybe in the next couple of weeks such letter will go out.

In the next few days, we are sending a Section 308 letter to the County to require them to sample and characterize what's coming out of four seeps along the Kaanapali coastline. This will give us a better idea of whether or not they are exceeding WQS. The letter will also require them to conduct a tracer study to determine the travel time between injection and the seeps. We've shared the draft Section 308 with Ted Bohlen with Hawaii State AG for review, and they did not have any comments.

David also may want to add some info from his conversation with Ted Bohlen, but David's not in today. He'll be back tomorrow.

Nancy

Subject: Status of Lahaina permit

Hi Nancy:

Nancy Woo has a call with Larry Lau on Thursday. In preparation for a call, I am pulling together an update on current issues. Will you please send me a sentence or two on the status of the Lahaina permit.

Thanks, Sara
