Thanks Janet. I agree that Thurs. pm would be a good time for the USGS briefing.

Subject: Re: USGS Injection Well briefing

I think Thursday pm or Friday would be best after all our program discussions. Also, I always do a meeting with USGS when I visit, so can have everyone join me for Chip's presentation, etc. It might be useful to have my ORD colleagues also participate, so if they're still around, I'll invite them to discussion. USGS is welcome to attend the monitoring workshop. I think it would be most useful in any case if they joined discussions on Tuesday, when we'll try to frame monitoring questions and design for W. Maui. I can try to set it up presentation/meeting with USGS for Thursday pm. We can take short walk to the USGS office. I have other business to discuss with USGS, so we'll have presentation first. If I can, I'm also going to try to meet with Roger Fujioka and follow up with him on his bacteriophage work. Janet

Monday and Tuesday is the Monitoring Design Workshop. Wed - Fri are the joint meetings. I'd say Thursday or Friday. What do others think?

Is USGS invited to the Monitoring Workshop?

Subject Re: USGS Injection Well briefingLink

I talked with Chip's boss at USGS who says yes to a briefing for EPA/DOH the week of Dec. 8 on the Lahaina and Kihei studies. Could someone suggest a good day for this???

One of the other studies Chip is working on is a DOH funded study of groundwater inputs/loads to Kaelepulu for the TMDL there...which also appears to be of wide interest to EPA .

Well, since a number of EPA folks are going to be out to Hawaii in Dec. for the EOY meetings, maybe we could convince USGS to do a joint briefing then. It's only a month earlier, but you would have a lot of key people there in person. If that is a problem, let me know if you think it would be helpful for me (or another manager) to contact Steve at USGS.

Subject USGS Injection Well briefing

After sending Chip Hunt an inquiry about scheduling a briefing on his Lahaina/Kihei results, I got a phone message from his boss, Steve Anthony. Steve says that Chip is busy on other projects and his contract with DOH for the Lahaina/Kihei work still has alot of time on it. USGS would like to wait until January to brief us. Do you think that's too

late? I'd sure like to hear from them during the Lahaina public comment period. Please let me know what you think about timing and I'll call Steve.
