Surprise - it looks like Gary Gill will participate so I might not get to as much detail as I would normally, but thanks for the update. I will mention the delay of the purchase of the LCMS

Enforcement Sensitive

Hi Nancy,

Sorry, meant to get this to you yesterday. I assume Stuart/DOH are still having to deal with tsunami impacts, so it will be interesting to hear anything on that front.

Two items of note for me -

1) We've now sent a draft enforcement order to Maui County that would require full disinfection at the Lahaina facility (the order that Stuart reviewed). I've not yet heard back from Kyle Ginoza, DEM director.

2) We are actively engaged with DOH, discussing their use of GW106 and some Monitoring Initiative funds for coastal seep sampling at Lahaina. We are running into cost issues, given the high cost of lab analysis for certain toxic constituents. EPA is exploring alternatives such as using the Richmond lab to conduct some analyses, narrowing the list of toxic constituents, and reducing the frequency of sampling/analysis to minimize costs. It seems like DOH is on board with doing this work - at least to the limits of their funding - but it would be good to hear if Stuart has any reservations. We are preparing a revised 308 letter to the County that would remove their obligation to conduct the seep sampling, but are doing so based on the understanding that DOH has agreed to take on this work.

Let me know if you have any questions.

Thanks,
David
