Subject: RE: Weekly Report

Thanks, Jonathan. Glad to hear the FMC grading design is moving forward. Are there still plans to start construction this year?

We should probably touch base next week and just check in on how things are going on FMC…

Weekly Report for Williams, Jonathan
Last Person to touch: Jonathan Williams
Office: ECL
Branch: RCP

Unit Acronym: SCU3
Team:
FINAL
For the week ending (enter a Thursday): 07/17/2014

A. HOT TOPICS
For this Week for possible elevation to RA (please be concise and indicate the project at the beginning of your comments):

None.

Upcoming (please be concise and indicate the project at the beginning of your comments):

None anticipated.

B. Other News (may be selected by UM to be elevated):

FMC OU of EMF Final Grading Phase Design Plans to be submitted July 18 in response to EPA and IDEQ comments of July 10.

Hylebos Waterway SAP for surface sediment quality sampling/analysis before/after raising of derelict vessel Helena Star finalized and sent out July 16. Acquisition of nine discrete sediment samples, compositing into three samples, and transport to Ecology's Manchester laboratory for analysis is scheduled to occur July 18. Ecology is providing the field sampling crew and sample transport to lab with EPA to pay for the analytical costs.

Mouth of Hylebos Clear Creek Mitigation Report final draft not submitted as anticipated in response to comments provided July 3. Questions raised about future monitoring to demonstrate effectiveness of planned maintenance.

C. Planned Significant Travel, Training & Leave (Please indicate your name at the beginning of your comments):

Jonathan Williams attended High Resolution Site Characterization (HRSC) course at the Regional Office along with some other RPMs and Hydrogeologists July 15-16, and will be on annual leave July 17.
