Subject: RE: Weekly

I was planning to put something in to that effect but not as a "hot item" as I don't think it requires upper management awareness. Also, EPA has not yet approved the FMC submittals and proposed schedule. The August 22 date might end up being pushed back.

I'll complete my weekly before leaving tonight. Thanks.

Jonathan – I was thinking we should put something in the Weekly "Hot Items" on FMC. Comments, changes, additions are welcome. THANKS!

FMC (near Pocatello, ID): This week EPA received final design documents for grading of the slag piles at the former FMC facility to prepare for engineered capping. Grading is scheduled to begin the week of August 22nd. Capping is planned for the 2015 construction season.
