My two cents -- we should be getting both their recent data AND their Peg Fork data through Spring 2012 at the same time we hand over our data.

Heads up. They are requesting the data we have so far (from Buffalo) so that they can review prior to our meeting. I dont have a problem, but it will be just the raw data. We can present our GLIMPSS etc scores when we meet. In return, should'nt they give us their Buffalo genus data to date ? And updated Peg Fork? They are also indicating that WVDEP mining folks may come along. Maybe Ben Lowman will serve as Consol's expert.

Hey Greg,

Thanks for the directions!

Yes, that was my understanding as well. I'll bring some maps and any other pertinent data.

Is there any way we would be able to get a copy of your partial data set to review prior to the meeting?

Also, I wanted to let you know that representatives from WVDEP may be attending the

meeting as well, since this is part of the NPDES permit evaluation process.

If you have any questions, please feel free to call me…Thanks!
Christy

Hi Christy, here are directions to our office. Just go in the front door of the church, go up to 3rd floor and ring the bell.

My understanding from our philly folks is that we will be looking at and discussing genus-level analyses with data from Peg and Buffalo data. Is that correct? We can also discuss any other aspect you'd like to !

Please bring whatever you want including maps. I have the bug data from Peg Fork up to last submittal (May 2011) and partial data for Buffalo from our May visit with you.

Hey Greg,

Hope you all had a great 4th of July! Ours was nice even thou we had golf ball size hail come down a few hours before the fireworks!

The 16th works for us...we'd be happy to drive up to Wheeling to meet with you all.

If there is anything in particular you would like us to bring, just let me know. I've gathered all the pre-existing mine portal data that Maggie had requested and I can send that over, along with a map of those areas. Ed also has all the Geology data Jessica had requested, but I'm not sure if you guys wanted a copy of that or not.

Talk to you soon,
Christy

Hi Christy, sorry for the late reply but if you are open on Monday the 16th, we can make it happen. We would prefer if you came here to Wheeling for a 2:00 meeting. But if you have troubles with that, please let us know and we can try to accommodate something else. I know you have kids and afternoon pick-ups make afternoon meetings difficult!

Greg

Hi Christy. Thanks for your note. All is well here.

Maggie is on leave this week, so when she gets back we will discuss open dates. Tentatively, that week could work. We will get back to you by next Monday or Tuesday.

Take care,

Greg

Maggie & Greg,

I hope all is well over in Wheeling. It was nice to chat with you again up at Philadelphia, Maggie. I was just following up and wanted to see what your schedules looked like for a follow-up meeting to further discuss the biology and water quality data in the Miller Creek watersheds to facilitate the Buffalo Mountain permit.

We would be more than happy to come over to Wheeling to discuss if you want or you are more than welcome to drive down to Canonsburg. Right now, our schedules are relatively open the week of the 16th in July. Are there any days that work that week for you all?

Please feel free to give me a call if you want.

Thanks!
Christy
