Subject: RE: FUDS contact for the Army Corps of Engineers

Hey, Jean – Nicole confirmed that since this isn't a site where EPA has any current involvement and where we've not done a review of the site information we would not be able to make such a recommendation to the City. Nicole suggests that contacting Cal OSHA would be one possible helpful approach.

Steven

Hey Jean – I'll forward this to Nicole … she'll have a better grasp on whether this is something EPA could weigh in on at this point in time.

I forgot to ask one question….is there anyway EPA can stop the City of Riverside and the developer from temporarily conducting activities on the Ag Park Site for now, until investigation is complete…we are concerned that city workers will be exposed to contaminates…the workers are concerned but they don't want to say anything..for fear of losing their jobs. I know this is a tough one…

Thanks,
Jean
