Mr. Ellinger,

Hello, I work for Mr. Bitner, but he will be out on leave for the next 2.5 weeks. I wanted to let you know that we have another party, CH2MHill who is developing a model for the ABCWUA BFF Contingency Plan effort. They will also be working on a model pretty soon and plan to produce a conceptual site model and a fate and transport model by September 2013. Please keep them in mind as well if you want to collaborate with them, with the others.

Regards,

Victoria R. Martinez

Subject: RE: Modeler Info

July is possible but it may still be undergoing internal reviews.

Thanks Scott, the meeting suggestion came after a meeting with NMED and our stakeholders. Agree with you, a draft model made available from the start would most likely lead to a more productive discussion. Rumor has it you are looking at having a draft ready sometime in July? I do have a contact for CB&I (formerly Shaw), USGS, ABCWUA's Contractor and USACE if you are interested in establishing contact.

Wayne,

I'm sorry it's taken this long to get back to you. I'm currently working on a first draft of a groundwater modeling report for NMED. I would prefer to have it done before having a meeting. You may already know I'm doing this at NMED's request. I don't mind being added as a contact, but when I have things more complete I'll be in a better position to discuss the model. I appreciate your offer of assistance and the information Kirtland has already provided.

My phone number is 214-665-8408; email: ellinger.scott@epa.gov

Subject: Modeler Info

All

I was notified by CB&I (formerly Shaw Environmental) that Dr. Gary Hecox is their modeler for the Bulk Fuels Plume. If you provide point of contact information for the modelers within your organization, I will compile and distribute to all addressees. In addition if there is a desire to meet, in person, Kirtland AFB would be happy to facilitate that meeting. Please let me know how I can be of any assistance with the modeling effort.
