Subject: RE: Cesspool@tmk: 1-4-6-001-002

done

Sorry this is taking so long. Given the time, and dealing with my neighbor, I have considered making major changes to my home, in conjunction with the installation of the septic system. This will not slow down my septic system installation, but may require my vacating the property until all the non-septic system changes can be made and tied into the new septic system.

Please bear with me, as I am trying to get the septic system installed as quickly as I can. I am just very uncomfortable with dealing, and continually monitoring, my cesspool. I have not had any problems with the cesspool, but I do not want any problems at all with it, except of course taking it out of use.

Regards,

Richard Kozuma
