Tailgate Talk

1. This "Tailgate Talk" handout provides a summary of the IIF Proactive Discussion Topic.
2. Use the Tailgate talk to facilitate field discussions, that don't have the benefit of overhead projectors/ multi-media communication.
3. Full length discussion topics and supporting materials may be referenced on the IIFL web-site.

Welcome to week eight of 1Q proactive event.

LPSA refresher: Three-step hazard identification and risk Assessment.

Share an LPSA today.

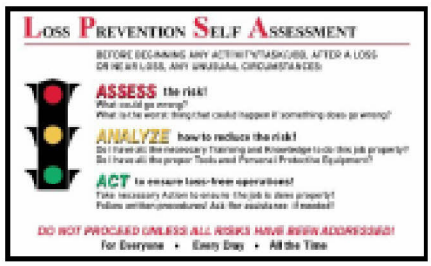
Play to Win
Richmond Refinery
meet or beat the plan
SF every day

Do you truly believe that all losses can be prevented?



Talking Points:

1. Refresh the group on what an LPSA is - show the LPSA Card (above).
2. Provide an overview of what and LPSA can do for us. We use the LPSA for Risk Assessment: One of the tools we have to help us identify risk is the LPSA. The LPSA is a brief, paperless, risk assessment conducted prior to the start of a work activity or task and anytime conditions or situations change.
3. Remind the group that the LPSA is a three step hazard and risk assessment.

    1. Red Light - STOP! **Assess The Risk**. Before beginning any task, ask yourself questions such as: What could go wrong while performing this task?
    2. Yellow Light. **Analyze how to reduce the risk**. While thinking about how to reduce the risk, ask yourself questions such as: Do I have the proper tools and equipment.
    3. Green Light – **Act to ensure loss free operation.** Has everything in the Analyze step been addressed? Did you get the right tool?

If all questions in the Analyze step have not been addressed, use your Stop/Pause Work Authority and take action to prevent a loss.

Discussion Topics/ Questions:

1.Do you truly believe that all losses can be prevented? Why or why not?
2.Can you think of a time when you have suffered a loss at work?
3.Would a LPSA/Risk Assessment have helped prevent that loss?
4.What steps should you take if you feel you don't have the proper training, tools or procedures to perform a task?
