Thank you! I noticed that too, but have been too swapped to follow up.

And I do appreciate letting us know your results. My management is interested. The last thing for us to work on is the list of wells that are tested biannually for pCBSA – including some of Phoung's monitoring well. Hopefully, I'll come up for air in a week or two and schedule a conference call about it.

Thanks, Cynthia

Cynthia,

I noticed the chain of custody form for the samples delivered to Eurofins on January 28, 2015 only listed sample numbers and no site names (Lillian said they put the site names on the sample bottles). I asked Lillian to provide a list for you (see e-mail from Lillian below). Also, we sampled one of the Montrose extraction well (G-EW-3) this morning. Lillian told me Montrose collected their own samples too. Thank you very much for your help!

By the way, Lillian also went to Golden State this morning and sampled Well Dalton 1. After my boss called them and informed them that we have the legal authority to conduct sampling at any reasonable time, they called me back and asked me to write an official letter explaining the purpose of the sampling, testing methods, detection limits, who will get the data etc. . Well, I finally secured the access. I will share the sampling results for all the samples collected from the drinking water wells (7 wells) with you once they are available.

Best regards,
