Hi Andy – Jim

I got a chance today to speak with Bill Brandon about the CSG proposal for the renewed GMP. I mentioned my extreme frustration that CSG/H&A remain committed to using existing monitoring wells we have already noted were not adequate boundary wells.

I know you are working on a response to their monitoring proposal which is more inclusive. Bill indicates that he is available Wednesday April 3rd to meet at the EPA lab to go over the current data, the CSM and the GMP response.

I would like to know if you and Jim are free that day and could meet at the lab for this discussion? He also wants another trip to the site to walk around.

If we can also discuss the source area plans _ overburden – I would like to prep that for the discussion that day as well.

Thanks

Cheryl L. Sprague
