Matsumoto, Kimi has shared a OneDrive for Business file with you. To view it, click the link below.

DB.EJ.RTC.CommentTopics.docx

Hello,
Here is where we are on the EJ RTC. I've grouped by topics and at the end of the document, I've noted the additional legal issues that came up in EJ comments but have overlap with other areas/responses.

Thanks,
Kimi

**Subject:** EJ RTC

Hi Corbin and Valois,
Attached is the EJ analysis RTC as we discussed. It (hopefully) merges all EJ comments and draft responses I've seen from both of you, includes my thoughts on some of those draft responses and has many blank placeholders for responses needed. The first page/section includes my notes from our discussion on where we might revise the EJ analysis – thanks Corbin, for starting that process.

Next steps:
- Will review Corbin's initial revisions to the EJ analysis.
- When you review this document, please make any changes to the framework, add any missing comments, etc.
- Where there are multiple comments on the same point, we can consolidate and summarize if you would prefer. For now, the comments are broken out and in quotes, but they don't have to stay that way.
- Work on the responses – revise existing draft responses and write new responses where they are blank

Any other thoughts, suggestions are welcome!

Thanks, Kimi
