Discharge Monitoring Report – Platform Grace
NPDES Permit No. CAG280000

Dear Mr. Blumenfeld:

This DMR reporting period covers the months of February, March and April 2014 for Platform Grace. There were no NPDES violations for this reporting period.

Included herein:

Attachment 1: EPA DMR forms (3320-1) for the related discharges and monitoring activities.

Attachment 2: is a listing of the Chemical Inventory for miscellaneous discharges.

Attachment 3: provides required pre-dilution and post dilution chlorine results for fire water discharges using an EPA approved test procedure.

The new General Permit became effective March 1, 2014. This DMR includes February, which falls under the previous permit, and the months of March and April which fall under the new permit. This DMR includes the old permit limits for the month of February and the new permit limits will be applied in the next DMR after the first quarterly chlorine samples are taken.

The following is a brief summary of some of the monitoring and reporting parameters affecting the various discharges:

Drilling Fluids and Drill Cuttings (001): There were no drilling discharges for this quarter.

Produced Water (002): There were no produced water discharges at Platform Grace. Produced water from Grace is sent to Platform Gail, which commingles with Gail's sour train production and is injected back into the oil production formation at Gail.

Deck Drainage (004): Deck drains were discharged and monitoring activities are reported in the DMR (there were no exceedances).

6267 Carpinteria Avenue, Suite 100, Carpinteria, California 93013 | Tel 805.745.2100 | Fax 805.745.1816 | www.venocoinc.com

Non-Contact Cooling Water and Fire Water (008, 009): There is no discharge of non-contact cooling water. As seen in Attachment 2, the test method used to estimate chlorine usage rates for the required chemical inventory is not an official EPA test method, but using this data better represents the chemical inventory values from month to month since the official EPA test method is required only quarterly. The chlorination system was offline throughout the quarter and there were no batch chlorination treatments. Therefore, there is no official NPDES chlorine result recorded for this DMR

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. See 18 U.S.C & 1001 and 33 U.S.C. & 1319. (Penalties under these statutes may include fines up to $10,000 and or maximum imprisonment of between 6 months and 5 years)

If you should have any questions or require additional information, please contact Pat Corcoran at (805) 745-2264.

Sincerely,

Larry Huskins
Operations Manager

COMMENT AND EXPLANATION OF ANY VIOLATION (Reference all attachments here.)

[1] Annual cumulative volume limit is applied to the cumulative volumes for the periods of March 2013 through February 2014, and March 2014 through February 2015. Due to the new permit, this DMR includes the first month of the new annual cumulative volume period. Therefore, annual cumulative volumes for two separate periods are recorded.

COMMENT AND EXPLANATION OF ANY VIOLATION (Reference all attachments here.)

[1] The sewage treatment unit is a marine sanitation device that complies with pollution control standards and regulations under Section 312 of the Clean Water Act. Thus, it is deemed to be in compliance with permit limitations for sanitary waste discharges (as per Condition II.E.1 Footnote 2 of CAG280000)

[2] Domestic waste is discharged separately.

[1] Annual cumulative volume limit is applied to the cumulative volumes for the periods of March 2013 through February 2014, and March 2014 through February 2015. Due to the new permit, this DMR includes the first month of the new annual cumulative volume period. Therefore, annual cumulative volumes for two separate periods are recorded

CHEMICAL INVENTORY
February 1, 2014 through April 30, 2014

Fluid Type	Volume (Monthly avg bbls per day)	Product Name	Estimated Chemical Quantity (Monthly avg gal per day)	Monthly Average End-of-Pipe[1] Concentration (mg/l)
009 Non-contact Cooling Water	No Discharge	N / A	None	None
008 Fire Control System Water		Chlorine		
February	20,571		N / A [2]	N / A [2]
March	20,571		N / A [2]	N / A [2]
April	20,571		N / A [2]	N / A [2]
013 Test Fluids	No Discharge	No Discharge	None	None
017 Water Flooding Discharges	No Discharge	No Discharge	None	None
021 Hydrotest Water	No Discharge	No Discharge	None	None

[1] End-of-pipe concentration and chemical quantity calculated with Operations daily monitoring results using a non-EPA chlorine test method (Hach DPD Color Wheel). This method is not an official EPA test method, but using this data better represents the chemical inventory values from month to month since the official EPA test method is required only quarterly.

[2] Chlorination system was offline throughout the quarter and no batch chlorination occurred.
