Thanks, Victor. Ray Plieness retired a few months ago. Not sure how this information you provided was being worked but will forward it on to David, Tom, and/or April who will most certainly know.

Hope all is well. Nice to hear from you.

Karen, I tried to send this email to Ray Plieness, but the email did not go through. Could you forward this information to those in DOE that might be interested.

Thanks,

Victor

Subject: FW: Darrow Freezeout Triangle Abandoned Uranium Mines Preliminary Assessment

The EPA has completed the preliminary assessment of the Darrow Freezeout Triangle abandoned uranium mines near Edgemont, SD. I have attached a fact sheet that summarizes this report. Based on the report, the EPA is planning to conduct a Site Investigation, primary to evaluate ecological risk associated with the surfacewater pathway. If you have any questions regarding this report, please contact me.

FYI – I have been contacting stakeholders of the completion of this report. Also, I am planning to be in South Dakota on September 29th and 30th to discuss the report with the stakeholders.
