MDNR Appendix F - Section Specific Comment 123:

Comment:

Table 4-1, Radionuclides of Concern in Soil at the West Lake Landfill, page 5 - The formula (Uranium-238 + Uranium-234)/2] x 0.05) is being used for the indicator radionuclide. Please explain what this formula is attempting to demonstrate.

Discussion:

As stated in the text, this approach is consistent with the approach described in the BRA.

Proposed Text Change:

The following footnote has been added to Table 4-1:

[a] The BRA used this approach to calculate risks from uranium-235. (See Section A.2.2.1 of the BRA.)

EPA FEEDBACK:

EPA accepts this response.
