St Elizabeth Hospital Belleville closed in November 2017, moved to 1 St Elizabeth's Blvd, O'Fallon, IL 62269 and did not move EtO Sterilization with them. They now use Vapor Phase Hydrogen Peroxide sterilization.

Subject: Question about St. Elizabeth Hospital in Belleville, IL
Importance: High

Hi Margaret,

I understand that St. Elizabeth Hospital in Belleville, IL has a cancer risk of 124 in one million at the census block level. Is St. Elizabeth Hospital still operating its ethylene oxide sterilization process?

Thanks,
Bao
