Subject: No Uranium Waste Storage on Lakota Land

Dear Valois Shea,

I'm writing to ask that the EPA deny the permits for the proposed Dewey-Burdock Uranium Mine project. This proposed mining project is likely to contaminate aquifers of the Black Hills and put the health and safety of those drinking that water at risk. In addition, the mining project is next to the Black Hills, and is within the boundaries of an area set aside for the tribes of the Great Sioux Nation by treaties signed in 1851 and 1868. The Black Hills are sacred to the Lakota Nation. These tribes oppose this mining project; it violates their 1851 & 1868 Treaty Rights and they did not give up their water rights or mineral rights to these areas. The EPA must deny these permits.

Thank you very much for your time.

All best,
