That sounds good. Have a good weekend.

Yes, I have seen a lot of similar FR language among the few PCTns that I have read! Now, that I know it needs to stay the same for the most part, I will certainly leave it alone.

I wanted to clean up the template. Jeana and I have a discussion planned after lunch. We will divide the tasks assigned to the biologists and have a plan to show you on Tuesday. We can add FR language later today. (It will make us both feel better to actually have something written in our first document!)

Hi Rebeccah,

You are probably already doing this, but most people cut-and-paste most of a previous PCTn document into the template and just revise. A lot of the FR language shouldn't be changed except for chemical/crop information as OGC has already reviewed it.

I know, some of the FR text needs to be rewritten, but some things you just have to let go.

Jonathan

Hi BEAD team,

Ex. 5 Deliberative Process (DP)

wanted to start collaborating on the document immediately. I found a template for documents submitted to RD and have started to fill it in. I have posted the document to Sharepoint, and you can find it here.

Please note that the PRP date has been automatically formatted to update, just like the date in the document's header.

Thanks,
Rebeccah
