Roger,

It looks like the spreadsheets you sent on Tuesday contain much of the water monitoring data collected to date.

We'd like to get as much of the information that is available as possible. I've attached two reports that contain a great deal of data from many matrices, but they don't include the location data in anything other than a very general way.

Thank you,

Andy

Andy,

Give me a call around 8:00 AM tomorrow and we can talk. I should be available until about 8:45 AM or so.

Roger

Roger,

This looks great – but I'm not quite sure what I'm looking at yet.

Would you be available to guide me through this tomorrow at 8:00 am?

Can I give you a call then?

Thank you very much,

Andy

Andy,

Attached are EXCL files with the locational information you requested for the private well monitoring for PFOA and HFPO-DA. Note that resident names and addresses are listed, so the information is considered "personal identifiable information" (PII) and should be treated as such. Please do not distribute to anyone outside the agency. Also note that only results designated as "PT" (prior to treatment) represent the raw ground water concentrations. Some of the other data listed represents after treatment concentrations and does not reflect the raw water concentrations. Please contact me if you have any questions. Thanks.
