Thanks Jenny. I'll get started right away.

Milo

Subject: Enforcement Confidential and Contains Personally Identifiable Information: DuPont Data for Ohio and West Virginia and Analysis for Ex. 6 Personal Privacy (PP)

Enforcement Confidential and Contains Personally Identifiable Information (PII)

Hi Milo,

The attached e-mail contains most of the data that I have for the DuPont/Chemours matter in Ohio and West Virginia. It also contains Personally Identifiable Information (PII). If you could please put this in a shape file as we discussed on the phone, that would be great.

Also, I included the consultant's explanation of the spreadsheets below, in case it is helping.

Ex. 6 Personal Privacy (PP)

Please mark the map "enforcement confidential" and "contains personally identifiable information". In the title block, please call the map something like **Ex. 6 Personal Privacy (PP)**

Thank you,
Jenny

Because the Washington Works project is in both West Virginia and Ohio, there are two spreadsheets of data attached here, one for the West Virginia data and one for the Ohio data. There are two word files as well, that explain our data verification module and the qualifier fields in the spreadsheets as well as a few other important pieces of information.

Please note that in many cases, there are several sample names associated with a single location. This happens for several reasons including just the project sample nomenclature changes over time (names were used initially, then we shifted to addresses), property ownership transfers, reassigning of addresses based on 911, resampling, etc.
