VOLUNTARY STATEMENT

I, Scott Tingelhoff, in the presence of Tim Creger, an employee of the Nebraska Department of Agriculture (NDA), voluntarily state:

I am the general manager of AltEn, LLC of Mead, NE. AltEn, LLC uses distilled treated seed and starch ~~by-product~~ to make ethanol destined for fuel uses. The company does not test the ethanol for pesticide residues, but does denature the final product as required by federal law.

The treated seed comes to AltEn from numerous seed companies who transport the discard seed to our location. The wetcake resulting from the ethanol process is stored on AltEn property and land applied as a soil conditioner. AltEn hires Settje Ag & Services and Engineering to license the land application sites and arrange for transportation to the field.

AltEn, LLC has a headquarters office in Shawnee, KS. The ethanol plant near Mead, NE is the only one the company owns.

I escorted Tim Creger to the wetcake discharge area and the discard seed warehouse. I watched Mr. Creger collect one bag of wetcake as a sample for testing. I explained that the plant operates year-round and uses approximately 10,000 bushels of seed daily. The company only started generating ethanol from treated seed Jan. 19, 2015.

I, the undersigned, have either written the above statement or reviewed it, and hereby acknowledge that it is a true and accurate account of the facts as I know them.
