Matt,

Just wanted to thank you again for your quick response. Attached are the meeting notes from our last meeting. So what we have is a company is making ethanol from waste treated seed corn and has been piling the left over wet cake for five years.

Subject: RE: Requesting Information on RED's

Hi Michael,

The registrations that I am working on are clothianidin, thiamethoxam and imidacloprid. These are relatively newer chemistries and registrations, and, therefore, there are no REDs for these chemicals. We are currently working on the interim decisions (ID) for these chemistries, which are anticipated to publish next year.

As for the other chemicals, I am not the chemical review manager (CRM) but our Office's website list the CRMs as follows:

- Azoxystrobin – Veronica Dutch
- Fludioxonil – Patricia Biggio
- Metalaxyl – No CRM listed but the Team Lead is Jocelyn Hospital
- Prothioconazole – Tiffany Green
- Tebuconazole – Jonathan R. Williams
- Trifloxystrobin – Samantha Thomas

I am cc'ing these managers and team lead for their attention.

Best Regards,

Matt

Subject: Requesting Information on RED's

Matthew,

I'm working on a case and was trying to find the latest EPA Registration Eligibility Decision (RED's) on the following : azoxystrobin, clothianidin, fludioxonil, metalaxyl, prothioconazole, tebuconazole, thiamethoxam, trifloxystrobin, imidacloprid, and I am having trouble with my browser and computer. Can you direct me to someone who can pull these for me?

Thank you,

Michael Daniels
