Hi Mark,

I was not asked to review the paper but I'll take a closer look. Good work and I'm sure the Tox people will appreciate the info.

Good to know about the Science paper and please share when it's available.

I think I'll be working from home for awhile although I've been to the lab/office a few times the past 2 months just to check on things. We had temp control and the whole screening before entering so everyone does feel safe. Oh, we all have to wear masks and gloves for some.

Cheers,
Lam

Hi Lam,

I suggested you as a reviewer. Not sure if it got to you. I am not yet sure what the NC phased changes mean to my lab. We are awaiting my managements decisions based on what the NC governor and health departments are saying.

The Solvay compound paper is in galley proof stage at Science. I expect it will be out soon. The proofs were due back yesterday.

Mark

Hi Mark,

Thanks for sharing.

Hope things are going well for you and I understand that NC will be partially opened starting next week. We are still struggling along here in DE. By the way, any news on your other paper regarding the Cl-containing compounds.

Best Regards,
Lam

FYI,

We had this paper go live in ES&T letters today. https://pubs.acs.org/doi/10.1021/acs.estlett.0c00323
