Subject: Final Test report for December 2019 Fluorinated Chemical Sampling Process C1 Dryer and Air Pollution Control System
2019_DEC__PFA Dryer system FINAL_Chemours PFA Report_04242020.pdf

Attached is the final report for the sampling of the exit concentration, control efficiency and emission rate for C4 through C14 fluoronated chemicals exiting from the polymer drying step of our C1 process located at Chemours Washington Works.

We supplied split samples for this testing through Test America. We would be interested in how you analysis compares to ours for the measured chemicals.

If you have questions about eh report or the sampling please contact me at this email or by telephone at (304) 863-4033.

Thank you and have a good day.
