Navy/Northrop-Grumman, Bethpage, NY: LRPB staff attended the January 4th virtual public meeting regarding Northrop-Grumman's (NG's) plans to install three off-site extraction wells, approximately 10,600 feet of off-site underground piping, and an on-site treatment system to treat contaminated groundwater which has migrated off-site of the former NG facility. The meeting was attended by 44 individuals, including representatives from NYSDEC, NYSDOH, the Town of Oyster Bay, the Bethpage Community Council (a citizens' group), and private citizens. Citizens' comments focused mainly on their request to be more engaged in the decision-making processes for the various remediations, their request for better coordination between activities conducted by Northrop-Grumman and the Navy (the two responsible Parties), and the need for more of the remedial actions to be conducted concurrently rather than serially. (Carol Stein, 4181)
