In Vitro and In Vivo Dose Response Modeling in Toxicology

Presented by: Dr Richard Judson U.S. EPA; Office of Research and Development; National Center for Computational Toxicology

Dr. Judson is with the EPA National Center for Computational Toxicology where he is developing computer models and databases to help predict toxicological effects of environmental chemicals. As part of the EPA ToxCast team, one current major focus is on the development of models of chemicals interacting with the endocrine system. His team has developed numerous databases and web-based dashboards. He has published in areas including computational biology and chemistry, bioinformatics, genomics, human genetics, toxicology and applied mathematics. Dr. Judson has a BA in Chemistry and Chemical Physics from Rice University and an MA and PhD in Chemistry from Princeton University.
