COMMENTS AND EXPLANATION OF ANY VIOLATIONS (Reference all attachments here)

Please note that Naphthalene is required to be analyzed as a VOC and SVOC per the new permit. The SVOC concentration was used for reporting, due to edits to the NETDMR form not being completed in time for submission; however the attached laboratory data contains both VOC and SVOC data.

TYPED OR PRINTED		SIGNATURE OF PRINCIPAL EXECUTIVE OFFICER OR AUTHORIZED AGENT	AREA Code	NUMBER	MM/DD/YYYY

COMMENTS AND EXPLANATION OF ANY VIOLATIONS (Reference all attachments here)

Please note that the new permit requires that Naphthalene be analyzed as a VOC and SVOC; however, due to an inadvertant sampling error the effluent from GP-003 was only analyzed as a SVOC. This value was used for reporting purposes.

COMMENTS AND EXPLANATION OF ANY VIOLATIONS (Reference all attachments here)

Results from GP-003 initially indicated an exceedance for TPH; The laboratory indicated that the sample result may be the result of laboratory cross contamination and the lab deemed the sample result invalid. The sample was reanalyzed and the results were within permit limits, however, the analysis was conducted outside of the holding time specified in the method. The discharge was re-sampled and analysis of the sample indicated parameters below the permit limit. Both lab reports are attached. The second sample is reported on the DMR

COMMENTS AND EXPLANATION OF ANY VIOLATIONS (Reference all attachments here)

Results from GP-003 initially indicated an exceedance for TPH; The laboratory indicated that the sample result may be the result of laboratory cross contamination and the lab deemed the sample result invalid. The sample was reanalyzed and the results were within permit limits, however, the analysis was conducted outside of the holding time specified in the method. The discharge was re-sampled and analysis of the sample indicated parameters below the permit limit. Both lab reports are attached. The second sample is reported on the DMR
