Subject: Media Inquiry - Gazette-Mail- Interview

Alice Chow spoke with Mike Tony of the Gazette-Mail this morning who has been emailing us all week about NATA data as it relates the Kanawha Valley I thought Alice did a very good job of explaining what NATA is and what it isn't. She also did a good job of explaining the difference between the NATA data and the work we are doing at the behest of West Virginia to more accurately model emissions of Ethylene Oxide emissions from two Union Carbide facilities located in South Charleston and Institute West Virginia.

The reporter also had a couple of questions about TRI and RSEI scores which Alice skillfully deferred on, but now I have to identify and reach out to the appropriate SMEs in those areas,

Let me know if you have any questions. Thanks,

David
