Subject: RE: Asbestos RE is ready for review and submission for IA/IA

Hello, Andy,

Agreed we need some more documentation. These work flows were only just created in the last 6-8 months and are still evolving. I would say the SOP process step could be as simple as:

- Transfer draft RE, RtC document (if applicable) and all draft supplemental documents to the Intra-agency review SharePoint site once cleared by EC RAD management for Interagency/Intra-agency review.

Now, for background and context, Randy Brinkhuis (of the former Info Management Division) and I planned/created that review site in consultation with Susanna Blair in the OPPT IO and with Stan Barone. The IA review site has limited access, which is partly why I had been the primary gatekeeper on our division's side. Randy controls the permissions, however, and I currently don't have the ability to add users, but that is easy enough to change. We had had started to give some of the team leads access as well to expand that circle and give us some flexibility, to avoid bottlenecks, in the event I am not available. Apart from that, access is limited to management and to the Intra-agency reviewers group, to whom Susanna Blair distributes the notification of availability.

There is another page/site that we are using on SharePoint for OGC and senior management review within OCSPP, which happens before IA/IA review. That site is set up similar to the IA/IA site and actually is hosted within the same directory. In addition, I *do* have the ability to give users access to that one. All of the first 10 RE team leads have access to that one, and so similarly, either I or the team lead(s) can transfer the documents.

There are some additional changes coming to the work flow for the next 20 chemicals which could affect the process/SOP – we are probably going to have separate review periods for the intra-agency and inter-agency stakeholder groups. The Inter-agency group does not use our SharePoint. Susanna takes the documents from there and uploads them into GovMax for their review, which up to the present moment has happened concurrently. If this is going to be two separate phases of review, it may impact how we transfer the documents for her upload into that GovMax system. In other words, it may not be prudent to use the same SharePoint portal. Stan was recommending these two separate periods to make our turnarounds more efficient and less overwhelming.

We used to do this all by email, so for the most part, it is an improvement over the previous method. It's a continual evolution.

Thank you all for sorting it out.

Ross, could you write for me a few bullets or steps for future reference, how we should move files from the team RE development site to the IA/IA interagency review site? I am in the process of pulling together a simple SOP for this, would like to add that step.

Basically: When the team lead has finished the package and I am ready to transmit to Susanna for IA/IA, what else do I need to make sure happens in order to get the files into the right place?

Thanks, Andy

Thanks – good to go on those. And I'll upload the other two, as well. Summary of progress I've heard is important for the interagency group, especially for OMB.

I would advocate only the public for the spreadsheets.....(for #8 and 12)....my two cents

I've uploaded everything except #8 and #12 – those are the primary two in question. Also, do the compare and the summary of progress documents go out?

Gino,

Can you help Ross and me out? We are trying to figure out what the difference is between the public and internal versions of these documents are and if they go to different places for review.

Collin

Here is what I'm seeing – a "public" and an "internal" copy for each of the docs: (I need to identify the correct one for interagency and intra-agency review upload).

1_Asbestos RE Part_1_RE_chrysotile_IA Review.docx	11/

Jenn, are you in? We need to get this ironed out immediately. Can anyone else help me identify the proper versions to upload?

These were never uploaded to IA site.

Ross

Adding Ross.

For the reviewers there are no files in this folder! Could you please double check that this is the right folder for the IA/IA review with the appropriate permissions?

Thanks,

Susanna

Subject: Asbestos RE is ready for review and submission for IA/IA

Susanna, Mark – on behalf of ECRAD I am pleased to convey that the Asbestos Risk Evaluation package is ready for IA/IA review.

This represents the collective effort of many individuals on the Asbestos team, currently led by Jen Nichols and previously led by Gino Scarano. Kudos to all who contributed; this has been a massive undertaking. Jen is preparing the high level summary of major changes from the previously published draft, and will be ready to brief the IA group next week.

Documents for review include:

- The revised Asbestos Risk Evaluation (clean)
- The revised Asbestos Risk Evaluation (track changes comparison to peer review draft)
- Asbestos Response to SACC and Public Comments
- Asbestos Supplemental Files, with numbered file names starting with 3:
    3. Data quality evaluation for PChem
    4. Data extraction for fate
    5. Data quality evaluation of environmental releases and occupational exposure
    6. Data quality evaluation of environmental releases and occupational exposure common sources
    7. Data quality evaluation for consumer exposure
    8. Data extraction for consumer exposure
    9. Data quality evaluation of ecological hazard studies
    10. Data quality evaluation of human health hazard studies
    11. Information on Occupational Exposure Calculations
    12. Exposure calculations (note – there is a public and an internal version, not sure which one to send)
    13. Data Quality Evaluation for Fate
    14. Summary of Responses Supplemental File- Epidemiologic Studies of Automotive Mechanics

Please let Jen or I know if there are any questions.

Best regards, Andy
